## 2021 BYOD Specification Guide

### Recommendations

	Operating System	Storage	Memory (RAM)	Screen Size
Years 7-9 Students	Windows Home	128 Gb	4 Gb	11 Inch
Years 10-12 Students	Windows Home	256 Gb	8 Gb	13 inch

### Additional Notes:

Operating System	Windows S	<b>NOT RECOMMENDED OR SUPPORTED</b> - You cannot install any other software other than from the Windows Store
Battery	<b>8 hours minimum (All day Battery)</b>	<b>Batteries deteriorate over time</b> , like in phones, so realistically the more in the beginning means the more likely the device is to last the full day in a year or so. Ensure the battery has at least an 8 hour lifespan to ensure longevity of the device.
Laptop Carry Case		<b>Choose a hard-shell case that the laptop can be transported and used in at all times.</b>
Warranty	On Site	This means that an engineer will come to the place you buy it from to fix issues with the device. This is often a quicker turnaround. They may also offer swap out devices while it is being fixed.
	Up to 3 years Warranty	Laptops often come with only a 12 month warranty. <b>We recommend at least an extra 2 years of Product Care is purchased.</b> That will mean 3 years of cover for the device should issues arise.
