Minimum Recommendations

	Operating System	Storage	Memory (RAM)	Screen Size
Years 7-9 Students	Windows Home	128 Gb	4 Gb	11 Inch
Years 10-12 Students	Windows Home	256 Gb	8 Gb	13 inch

Additional Notes:

Operating System	Windows S	NOT RECOMMENDED OR SUPPORTED - You cannot install any other software other than from the Windows Store
Battery	8 hours minimum (All day Battery)	Batteries deteriorate over time , like in phones, so realistically the more in the beginning means the more likely the device is to last the full day in a year or so. Ensure the battery has at least an 8 hour lifespan to ensure longevity of the device.
Laptop Carry Case		Choose a hard-shell case that the laptop can be transported and used in at all times.
Warranty	On Site	This means that an engineer will come to the place you buy it from to fix issues with the device. This is often a quicker turnaround. They may also offer swap out devices while it is being fixed.
	Up to 3 years Warranty	Laptops often come with only a 12 month warranty. We recommend at least an extra 2 years of Product Care is purchased. That will mean 3 years of cover for the device should issues arise.
